

Markus Leitner (University of Vienna)

Short Biography

Markus Leitner is currently working as an Assistant Professor at the University of Vienna, see <http://homepage.univie.ac.at/markus.leitner/>. His main research interests include combinatorial optimization and (computational) operations research. In his current research, he strongly focuses on theoretical and computational aspects of mixed integer programming and considers applications in network design, telecommunications, transportation and logistics. He has published more than 25 scientific articles in leading OR journals and led several, international third party projects.
